Wright College

WHO SHOULD ATTEND?

- Commercial & Residential Contractors
- Demolition Contractors
- Business Licensing Officials
- Building Maintenance Providers
- Home Inspectors
- Local Building Code Officials
- Local Fire Departments

DID YOU KNOW?

Contractors, owners, and possibly local governing bodies can be assessed fines and penalties for failing to meet asbestos regulatory requirements for remodeling or demolition of property.

A licensed professional must perform lead, radon and asbestos abatement.

Contractors must meet federal lead requirements when remodeling residential property built before 1978.

Construction and demolition debris must be transported and disposed of according to Illinois EPA Regulations.

Lead and asbestos regulations vary depending on previous property use, as well as, future property use after the remodel/demolition.

Fire departments must follow asbestos regulations when burning property for training purposes.

A mold problem is a moisture problem and all types of mold should be treated with respect.

The number of reported methamphetamine labs continues to rise in Illinois.
COME LEARN FROM THE EXPERTS!

Greg Leneghan, Illinois Department of Commerce and Economic Opportunity, Energy Programs
The Illinois Energy Conservation Code for Commercial Buildings requires all new commercial construction for which a building permit application is received by a municipality or county to follow a comprehensive statewide energy conservation code. Renovations, alterations, additions, and repairs to most existing commercial buildings must follow the Illinois Energy Conservation Code effective April 8, 2006. Learn how this new law may effect you.

Staff of the Asbestos Program, Illinois Department of Public Health
Do you know the consequences of improper removal of asbestos containing building material or no asbestos inspection prior to renovation or demolition? Do you know what activities require a licensed abatement contractor and/or licensed inspector? Do you know when to file appropriate notifications with the IDPH or IEPA? This discussion on Asbestos in Commercial and Building Projects (CPB) and the code used to enforce the safe removal of asbestos containing building materials is something everyone in the industry should be aware of.

Cindy Ladage/Patrick Daniels, Radon Program, Illinois Emergency Management Agency
Many developers and a growing number of counties and municipalities require the installation of passive radon reduction systems in new residential construction. Learn the basics about correct installation. If a passive system is not installed correctly, the health benefits and cost savings of the passive installation may be lost. Find out about new fees associated with asbestos notifications.

Staff of the Environmental Lead Program, Illinois Department of Public Health
Learn how to address lead-based paint issues when working in residential dwellings and child-care facilities as well as lead-based paint disclosure requirements for renovators and remodelers working in older homes. Learn about training and licensure requirements for persons that disturb lead-based paint.

Are you confused by complex environmental rules and regulations? Know what to file, with which agency, and when? Help is available to you, come hear about the free, confidential assistance program located in a non-regulatory agency designed to help small business understand their regulatory requirements.

Staff of the Safety & Health Consultation Program, Illinois Department of Commerce & Economic Opportunity
Come find out some of the most cited violations by OSHA, what OSHA standards are required for small businesses, and how to get your company in compliance with Illinois law will be presented and your questions will be answered.

Ken Barnes, Waste Management and Research Center
Learn about the IL Department of Natural Resources’ environmental technical assistance program to assist Illinois developers and contractors to understand green building concepts and principles; identify markets for end-of-life recycling and waste stream reuse, use recycling practices and end-of-life waste stream reuse in new construction and renovation, and understand green building design.

TO LEARN MORE, ATTEND 1 OF 10 STATEWIDE WORKSHOPS
Workshop Times: 8:30 a.m. - 4:00 p.m. (Registration starts at 8:00 a.m.)
Non-Renaudable Fee $25.00 (refund provided)

Wednesday, January 25 • Oakley Lindsay Center
Lindsay Room • 300 Civic Center Plaza • Suite 237
Quincy, IL 62301 • 217-223-1000
Directions: www.quincycenter.com

Wednesday, February 1 • Gateway Center
#1 Gateway Drive • Mitsubishi Room
Collinsville, IL 62234 • 618/342-8998 • 800-289-2388
Directions: www.gatewayout.com

Wednesday, February 8 • Danville Area Community College
Vermilion Hall, Room 306 • 28 West North Street
Danville, IL 61832 • 217-442-7432
Directions: www.dacc.edu

Thursday, February 23 • John A. Logan College Workforce Development/Construction Mgmt Bldg., Room H 127 • 700 Logan College Road
Carbondale, IL 62918 • 618/985-2828
